Makedo connects stuff together

4 simple parts

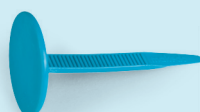

Safe-saw™

The Safe-saw™ can cut through various types of material and can punch holes without the risk of injury.

Re-clip™

The Re-clip™ is composed of the pin and clip which clamps material together. Squeeze the clip to release the parts for reuse.

Lock-hinge™

The Lock-hinge™ acts as a hinge by joining two materials together. It can lock into 10 fixed positions or swing freely.

Scru™

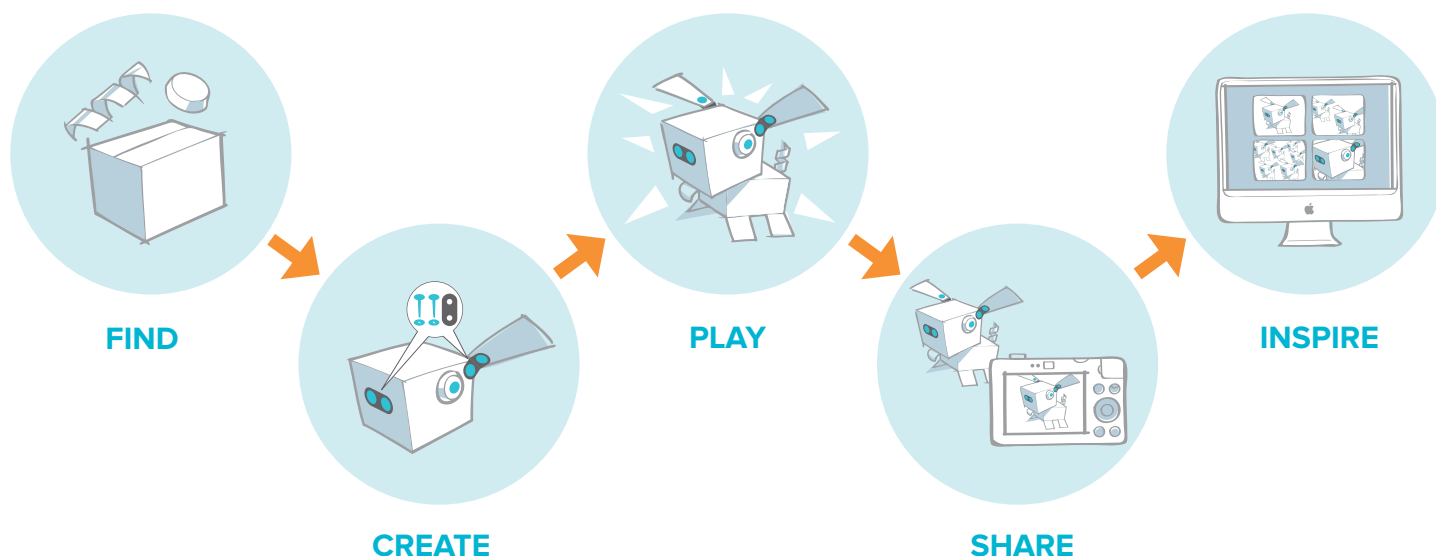

The new Scru™ screws quickly and neatly directly into cardboard to attach material together. The handle grip doubles as a bracket to hold sheet materials upright.

Find&Make

Guided creativity

Project-based making.

Find&Make introduces children to the idea of using found materials as building blocks for their creativity by guiding them to find packaging common in the home and make a specific creation such as a Robot, a Car, Flowers, a Dollhouse or a Playhouse.

Based on classic themes to appeal to both boys and girls, each Find&Make kit includes Makedo's reusable connector system, themed decorative stickers, beautifully illustrated step-by-step instructions, and a gorgeous inspiration poster.
